Eugene Voroniuk

Senior Product Designer

14+ years · 0-to-1, core product & complex SaaS

Experience

Senior Product Designer

Miro | 2021 - Present | Amsterdam

• Expanded a narrow custom-template initiative into an end-to-end enterprise workflow, defining discovery, organization, safe publishing, and multi-user permission models.
• Moved signup from an external redirect into four pre-products, validated stronger conversion through experimentation, and supported a portfolio-wide rollout.
• Led the multi-product Checkout redesign, replacing an unscalable legacy flow and enabling scalable add-on monetization in support of ARR growth.
• Designed an enterprise seat trial across four invitation surfaces, delivering statistically significant gains in invitation and member-addition behavior and informing subsequent growth work.
• Shipped a public-board signup CTA after a statistically significant acquisition test, then redesigned template discovery when the primary conversion effect was flat.

Senior Product Designer

Wix.com | 2019 - 2021 | Kyiv

• Owned product design for Wix Groups from development through launch and iteration across web, iOS, and Android, serving Wix's 200M+ user platform.
• Defined the end-to-end product experience — product structure, flows, interaction design, visual design, and specs — while integrating Groups into the wider Wix ecosystem.
• Operated with high autonomy as the primary designer for much of the product lifecycle, partnering with product and engineering on discovery, product decisions, distribution, and post-launch iteration.

Senior Product Designer

Star (ex-Cogniance) | 2015 - 2019 | Kyiv

• Led discovery and product design across 10+ client engagements spanning IoT, HealthTech, Telematics, Wearables, GovTech, and AdTech.
• Several were greenfield products starting from ambiguous problems; defined product structure, information architecture, and interaction models under technical and regulatory constraints.

Earlier experience

• Designed data visualizations, infographics, and web experiences at Ciklum (2013-2015), supporting consulting and marketing teams.

• Designed website UX and production-ready visual assets at Vortex InterCom (2011-2013), enabling direct engineering handoff.

Selected independent work

• Simple Screen Recorder (2026): Conceived, designed, built, and launched a local-first Chrome product for turning browser flows into polished walkthroughs; iterated from real user feedback after launch.

• Wren (2026): Researched, designed, built, and launched an ADHD-friendly expense-tracking PWA from problem exploration through working product.

Education

Anthropic
AI Fluency Framework & Foundations
2026

Reforge
Growth Series Alumni
2022 → 2023

Nielsen Norman Group
UX Certificate
2021

Kyiv National University of Technologies and Design
BA Graphic Design
2009 → 2013

Expertise

Product design / UX
0-to-1 product development
Core product / complex workflows
Interaction & visual design
Product strategy & UX research
B2B / Enterprise SaaS
Product-led growth (PLG)
Activation & onboarding
Monetization / free-to-paid
Experimentation / A/B testing
Design systems
AI-assisted product building
